Introduction of Univar Grease XTS 0

Univar Grease XTS 0 is a polytetrafluoroethylene thickened lubricating grease based on perfluoropolyether. The special thickener system and base oil makes the product chemically inert and therefore resistant to strong acids and bases as well as aggressive chemicals and solvents. The grease has excellent thermal stability which makes it suitable at high temperatures up to 270 C and can be used in gearboxes that can use grease as a lubricant in very hot conditions as can be found in for example soot blowing devices where steam pipes goes through the gearbox.

The product is accepted as a lubricant with incidental food contact (H1, HX-1) for use in and around food processing areas, Category Code: H1;HX-1, NSF Registration No:146297.

Materialinformation:

| Name | Materialnumber | Description |
|---------------------|----------------|-------------|
| Univar Grease XTS 0 | 1010273 | 1 x 10 kg |
| Univar Grease XTS 0 | 1010884 | 1 x 2 kg |

If in doubt, you can find Shell lubricant recommendations on Shell Lubematch or scanning the QR code below.
